COEN 180 - Santa Clara University Physics of Magnetic Storage Figure 1: Magnetic Write Head Schematics Magnetic recording consists of leaving patterns of remanent magnetization on a track within the surface of magnetic media that sits on top of a non-magnetic substrate.

Magnetic Tape Recording - HyperPhysics Concepts Magnetic Emulsions. The recording medium for the tape recording process is typically made by embedding tiny magnetic oxide particles in a plastic binder on a polyester film tape. Iron oxide has been the most widely used oxide, leading to the common statement that we record on a "ribbon of rust. NPTEL Phase II :: Physics - Physics of Magnetic Recording ... This is the first course in physics of magnetic recording and media, which introduces the fundamental concepts on magnetic recording, form of recording media, and magnetoelectronics. Also, the overview of magnetism in solids, various types of anisotropies, soft and hard magnetic materials would be discussed. Materials for heat-assisted magnetic recording Figure 2 charts the future HDD technology roadmap with a steady progression of storage technologies from today's perpendicular magnetic recording (PMR) to heat-assisted magnetic recording (HAMR) to heated-dot magnetic recording (HDMR).

Microwave assisted magnetic recording (MAMR) technologies Another energy-assisted magnetic recording technique is microwave assisted magnetic recording (MAMR). This is a combination of microwave assisted switching (MAS) and spin torque oscillator (STO), in which a radio frequency (rf) field generated by the STO induces magnetization switching.
